15. Contract Amendments

No variation in or modification of the terms of the Contract shall be made except by written amendment signed by the parties.

16. Delays in the Supplier's Performance

16.1 Delivery of the Goods and performance of Services shall be made by the Supplier in accordance with the time schedule prescribed by the Procuring agency in the Schedule of Requirements.

16.2 If at any time during performance of the Contract, the Supplier or its subcontractor(s) should encounter conditions obstructing timely delivery of the Goods and performance of Services, the Supplier shall promptly notify the Procuring agency in writing of the fact of the delay, its likely duration and its cause(s). As soon as practicable after receipt of the Supplier's notice, the Procuring agency shall evaluate the situation and may at its discretion extend the Supplier's time for performance, with or without liquidated damages, in which case the extension shall be ratified by the parties by amendment of Contract.

16.3 Except as provided under GCC Clause 19 a delay by the Supplier in the performance of its delivery obligations shall render the Supplier liable to the imposition of liquidated damages pursuant to GCC Clause 17 unless an extension of time is agreed upon pursuant to GCC Clause 16.2 without the application of liquidated damages.

17. Liquidated Damages

Subject to GCC Clause 19, if the Supplier fails to deliver any or all of the Goods or to perform the Services within the period(s) specified in the Contract, the Procuring agency shall, without prejudice to its other remedies under the Contract, deduct from the Contract Price, as liquidated damages, a sum equivalent to the percentage specified in SCC of the delivered price of the delayed Goods or unperformed Services for each week or part thereof of delay until actual delivery or performance, up to a maximum deduction of the percentage specified in SCC. Once the maximum is reached, the Procuring agency may consider termination of the Contract pursuant to GCC Clause 18.

18. Termination for Default

18.1 The Procuring agency, without prejudice to any other remedy for breach of Contract, by written notice of default sent to the Supplier, may terminate this Contract in whole or in part:

- (a) if the Supplier fails to deliver any or all of the Goods within the period(s) specified in the Contract, or within any extension thereof granted by the Procuring agency pursuant to GCC Clause 16; or
- (b) If the Supplier fails to perform any other obligation(s) under the Contract.
- (c) If the Supplier, in the judgment of the Procuring agency has engaged in corrupt or fraudulent practices in competing for or in executing the Contract.

18.2 In the event the Procuring agency terminates the Contract in whole or in part, pursuant to GCC Clause 18.1, the Procuring agency may procure, upon such terms and in such manner as it deems appropriate, Goods or Services similar to those undelivered, and supplier shall be liable to the Procuring agency for any excess costs for such similar Goods or services. However, the Supplier shall continue performance of the Contract to the extent not terminated.

19. Force Majeure

19.1 Notwithstanding the provisions of GCC Clauses 16, 17 and 18, the Supplier shall not be liable for forfeiture of its performance security, liquidated damages, or termination for default if and to the extent that its delay in performance or other failure to perform its obligations under the Contract is the result of an event of Force Majeure.

19.2 For purposes of this clause, “Force Majeure” means an event beyond the control of the Supplier and not involving the Supplier’s fault or negligence and not foreseeable. Such events may include, but are not restricted to, acts of the Procuring agency in its sovereign capacity, wars or revolutions, fires, floods, epidemics, quarantine restrictions, and freight embargoes.

- 19.3 If a Force Majeure situation arises, the Supplier shall promptly notify the Procuring agency in writing of such condition and the cause thereof. Unless otherwise directed by the Procuring agency in writing, the Supplier shall continue to perform its obligations under the Contract as far as is reasonably practical, and shall seek all reasonable alternative means for performance not prevented by the Force Majeure event.
- 20. Termination for Insolvency** 20.1 The Procuring agency may at any time terminate the Contract by giving written notice to the Supplier if the Supplier becomes bankrupt or otherwise insolvent. In this event, termination will be without compensation to the Supplier, provided that such termination will not prejudice or affect any right of action or remedy which has accrued or will accrue thereafter to the procuring agency.
- 21. Termination for Convenience** 21.1 The Procuring agency, by written notice sent to the Supplier, may terminate the Contract, in whole or in part, at any time for its convenience. The notice of termination shall specify that termination is for the Procuring agency's convenience, the extent to which performance of the Supplier under the Contract is terminated, and the date upon which such termination becomes effective.
- 21.2 The Goods that are complete and ready for shipment within thirty (30) days after the Supplier's receipt of notice of termination shall be accepted by the Procuring agency at the Contract terms and prices. For the remaining Goods, the Procuring agency may elect:
- (a) to have any portion completed and delivered at the Contract terms and prices; and / or
 - (b) To cancel the remainder and pay to the Supplier an agreed amount for partially completed Goods and Services and for materials and parts previously procured by the Suppliers
- 22. Resolution of Disputes** Resolution of dispute shall be through Mechanism for Redressal of Grievances as provided in the rules or through Arbitration Act 1942.
- 23. Governing Language** The Contract shall be written in English language all correspondence and other documents pertaining to the Contract which are exchanged by the parties shall be written in the same language.
- 24. Applicable Law** The Contract shall be interpreted in accordance with the SPP Rules 2010 (amended up to date).

- 25. Taxes and Duties** Supplier shall be entirely responsible for all taxes, duties (including stamp duty), license fees, etc., incurred until delivery of the contracted Goods to the Procuring agency.
- 26. Overriding effect of Sindh Public Procurement Rules 2010 (Amended 2019)** In case of conflict or primacy of interpretation the provisions of SPP Rules 2010 (amended up to date) shall have an overriding effect notwithstanding anything to the contrary contained in these bidding documents

ITEM NO. 02	HYPERVISOR (COMPUTE VIRTUALIZATION)	06 Sockets
--------------------	--	-------------------

S#	Technical Description, Specifications and Standards Required
2.1	Proposed Solution should be highly redundant providing capability for the VMs to restart on another node in case of any Node failure in the Cluster.
2.2	Proposed Compute Virtualization software should be developed based on KVM, with good maintainability, and there is no need to bind and install OpenStack-related components during deployment
2.3	Proposed Solution must support the backup of virtual machines in VMware vCenter on the local management platform, and enable the startup and recovery of VMware virtual machines on the hyper-converged platform
2.4	Proposed Solution must provide VM Snapshot capability to revert back to previous point in time in case a failure or system error occurs.
2.5	Proposed Solution must provide VM Clone capability for creating cloned instances from source VM for testing or any other purposes.
2.6	Proposed Solution must provide VM vMotion / Live Migration capability to Live migrate VMs to any nodes in the Cluster without any downtime.
2.7	Proposed Solution must provide the capability to automatically hot-add resources including vCPUs and Memory real-time based on VM contention.
2.8	Proposed Solution must provide automated Resource Scheduling and Load Balancing capability for balanced performance on all nodes across the cluster.
2.9	Proposed Solution must provide Distributed Switch capability to configure and administer switching for the entire Cluster.
2.10	Proposed Solution must provide Hardware Health Check capability to Monitor CPU, Memory, Network Interface Card, Hard Drive and RAID Controller etc.
2.11	Proposed Solution must support SNMP and Web API Services.
2.12	Proposed Solution must support patch update, rollback feature.
2.13	Proposed Solution must support UPS integration. To ensure the business in the data center power failure scenario as much as possible, the UPS can temporarily supply power when the mains power is cut off to perform a soft shutdown of VMs.
2.14	Proposed Solution must support setting alarm type (emergency and general), alarm content (cluster, host, virtual machine, CPU, memory, storage), automatically give alarm handling suggestions for alarm information platform, and support alarm information in the form of SMS and email Send it to the administrator.
2.15	Proposed Solution must support One-click database deployment operation, database type can be selected, including MySQL, SQL Server and Oracle, and deployment architecture can be selected, including MySQL (stand-alone, master-slave), SQL Server (stand-alone, AlwaysOn), Oracle (stand-alone, RAC).
2.16	Proposed Solution must support Hardware & Software Health Check to Monitor CPU, Memory, Network Interface

	Card, Hard Drive and RAID Controller.
2.17	Proposed Solution must support Host CPU & Memory Overcommitment Ratio Control.
2.18	Proposed Solution must support virtual machine USB mapping across physical hosts, you can perform virtual machine USB mapping operations, and you can check whether the USB resources on the physical host before the migration are normal after the virtual machine is migrated to another physical host
2.19	To avoid a series of problems caused by the host's suspension, it supports identifying the suspended host and labeling it as a sub-healthy host, reminding users to deal with it through email or SMS alarms, and restricting important businesses from running on sub-healthy hosts to avoid risks (It is necessary to provide a screenshot of the product function and affix the official seal of the vendor)

ITEM NO. 03	STORAGE VIRTUALIZATION	06 Sockets
--------------------	-------------------------------	-------------------

S#	Technical Description, Specifications and Standards Required
3.1	Proposed Solution must be from the same Vendor as the Hypervisor.
3.2	Proposed Solution must provide both "2 Copies" and "3 copies" options for data redundancy to be selected from while initial configuration of Virtual Storage.
3.3	Proposed Solution must provide Data Striping capability with flexible stripe width.
3.4	Proposed Solution must provide Data-At-Rest Encryption (In-Built) for VM Data Security without using any specialized Hardware such as Self-Encrypting Drives (SEDs).
3.5	Proposed Solution must support SSD Data Tiering.
3.6	Proposed Solution must provide SSD based Read Caching and Write Buffer capability to improve the performance of the I/O.
3.7	Proposed Solution must provide Data Balancing capability to more evenly distribute the data across the devices to achieve a balanced distribution of resources.
3.8	Proposed Solution must support data reconstruction to intelligently protect business performance, and can intelligently limit the data reconstruction speed to avoid IO performance occupation during the data reconstruction process from affecting business performance
3.9	Proposed Solution must Support Data Reconstruction Priority Adjustment. While the Faulty Data Restore Process, High Priority VMs Should Be Reconstructed First to Ensure the Security of Important Business Data.
3.10	Proposed Solution must support striping based on disk.
3.11	Proposed Solution must support the hard disk life prediction function, which can estimate the remaining usable time of the hard disk and give real-time warning to remind users to replace the hard disk safely without affecting the business before the disk life expires
3.12	Proposed Solution must support Multiple Virtual Storage Volume, Must Build up atleast 2 Virtual Storage Volume in same Cluster, Including: High Performance Volume by Pure Flash Volume Disk, Low Performance Volume by Tiering Disk and HDD Data Disk
3.13	Proposed Solution must Support Intelligent Bad Sector Prediction for Better Operation and Maintenance, Accurately Identifies the Hard Disks That Will Have Bad Sectors and Avoids Failure Risks
3.14	Proposed Solution must support hard disk capacity prediction function, and can issue capacity alarm according to the threshold value set by customers, provide guidance for users to expand capacity, and avoid sudden capacity shortage problems during use

ITEM NO. 04	NETWORK VIRTUALIZATION	06 Sockets
--------------------	-------------------------------	-------------------

S#	Technical Description, Specifications and Standards Required
4.1	Proposed Solution must be from the same Vendor as the Hypervisor.
4.2	Proposed Solution must provide capability to display Virtual Datacenter Network Topology for easy Management and Troubleshooting.
4.3	Proposed Solution must provide capability for L2 bridging with Physical Environment for Network connectivity of Internal workloads with Physical Network.
4.4	Proposed Solution must provide capability to manage Switching and Routing of Internal workloads by providing Virtual Switches and Virtual Routers. Routing of External Physical / Virtual Workloads should also be managed by the Virtual Router.
4.5	Proposed Solution must provide Micro-Segmentation / Distributed Firewalling feature for isolation of East-West Traffic between VMs.
4.6	Proposed Solution must provide capability to display Network Traffic Flow in Real-Time.
4.7	Proposed Solution must provide complete Network Visualization of Virtual Network.
4.8	Proposed Solution must provide capability for Network Quality of Service (QOS).
4.9	Proposed Solution must Support Communication Domain to Connect Up to 1024 Hosts Via VXLAN Technology.
4.10	On the management platform, you can complete the construction of the network topology by dragging and dropping the connection, and you can use the function keys on the network topology page to realize operations such as virtual network connection, opening and closing.

ITEM NO. 05	SECURITY VIRTUALIZATION	06 Sockets
--------------------	--------------------------------	-------------------

S#	Technical Description, Specifications and Standards Required
5.1	Our organization hopes that the platform we build can be self-controlled and requires that the security virtualization software of the hyper-converged product be completely independently developed, not OEM, and needs to provide a software copyright certificate for Security Virtualization.
5.2	Based on business security considerations; to avoid additional economic losses and simplify the complexity of handling security issues, the cloud platform needs to provide a reliable guided ransomware virus processing process, including emergency isolation, retaining the status, restoring the cloud host, scanning viruses, and restoring the network. It also supports pre-ransomware virus protection, automatic snapshots of virtual machines during suspected ransomware detection, and post-ransomware virus guided processing (certificate materials from a third-party testing agency with CNAS and CMA qualifications must be provided, including at least the report homepage, the corresponding function test page, and the report end page)
5.3	Considering the network security of cloud platforms, cloud platforms need to have built-in distributed seven-layer network attack protection capabilities. Support enabling network protection functions for specified virtual machines, batches of virtual machines, specified IP addresses, and specified IP ranges based on virtual machines, and do not invalidate security capabilities due to IP address changes or migrations. Support configuring network attack protection policies for tenant VPC networks. (Product function screenshots must be provided and stamped with the manufacturer's official seal).
5.5	Since most of the company's businesses need to run uninterrupted and safely on the cloud platform, when a network attack occurs, the cloud platform must have virtual patch capabilities, which can directly enable virtual patch protection for designated virtual machines at the network layer without patching the host operating system.
5.6	Considering the security of virtualized services, the cloud platform and security capabilities should support linkage to achieve the best security effect. A cloud security center of the same brand should be provided to achieve unified security management without interface jumps to improve security operation and maintenance efficiency. A one-stop workbench should be provided to display the security protection status of cloud assets, including security risk distribution, and the top 5 cloud hosts with risks such as viruses, attacks, and vulnerabilities
5.7	In order to facilitate the flexible expansion of subsequent business virtual machines, secure virtualization authorization is required to support authorization based on the number of CPUs, and the authorization can be increased as the number of virtual machines increases.
5.8	In order to facilitate operation and maintenance personnel to obtain the platform security status in a timely

	manner, the cloud security center needs to support security event display, security risk analysis, risk trend analysis, alarm and disposal records, virus and vulnerability scanning records, and implement monitoring of the protection status of virtual machines.
5.9	X86 parameters: Based on business security and operation and maintenance efficiency considerations, the virtualization platform needs to support the automatic installation of components to protect the operating system when the performance optimization tool is installed on the virtual machine. (Certificate materials from a third-party testing agency with CNAS and CMA qualifications must be provided, including at least the first page of the report, the corresponding functional test page, and the last page of the report) ARM parameters: Based on business security and operation and maintenance efficiency considerations, the virtualization platform needs to support the automatic installation of components to protect the operating system when the performance optimization tool is installed on the virtual machine.
5.10	Considering the security of business virtual machines, the cloud platform needs to support scanning virtual machine vulnerabilities, viewing vulnerability details and recovery. Including detection time, detection source, solution suggestions, repair process, etc. And the ability to repair the scanned vulnerabilities.
5.11	Based on business security considerations, in order to obtain a more comprehensive understanding of threat situations and trends, it is necessary to support collaborative responses with the security intelligence center of the same manufacturer, associate the cloud feedback threat intelligence data of hundreds of thousands of online security devices, and the threat intelligence data exchanged by third-party partners, conduct intelligent analysis, and accurately distribute threat intelligence.
5.12	Considering the network security of the cloud platform, the cloud platform needs to support anti-brute force cracking, count the brute force cracking detection of single attack sources and distributed attack sources, support blocking according to RDP, SMB and SSH types and customize the brute force threshold, and can set the blocking time by itself. It supports the display of brute force cracking events detected by the terminal and event details, including attack source, attack type, and last attack time.
5.13	This unit's bidding requires the cloud platform to meet the requirements of the third level of commercial cryptographic application security assessment; because the unit's business needs to run on a virtualized platform, the hyper-converged software needs to be able to use the cryptographic algorithms and encryption machines and encryption card products approved by the national cryptographic management department to encrypt the software data.
5.14	Based on business encryption requirements, cloud platform virtual machines should support direct access to domestic encryption cards and virtualization segmentation. Considering the high availability of encryption cards, they must support encryption card virtual machine HA and migration operations.

ITEM NO. 06	VM BACKUP SOLUTION	All VMs on Nodes
--------------------	---------------------------	-------------------------

S#	Technical Description, Specifications and Standards Required
6.1	Proposed Solution must be fully Compatible with Compute Hypervisor
6.2	Proposed Solution must provide the capability to take Full / Incremental level VM Backups.
6.3	Proposed Solution should be licensed in a manner to take backups of every VM in the Cluster regardless on which physical Node it resides on.
6.4	Proposed Solution must provide Automated Scheduling for Backups based on Hourly, Daily, weekly etc. scheduling.
6.5	Proposed Solution must support to configure Internal Virtual Storage, External SAN or NAS to be Backup repository for Storing Virtual Machine Backups.
6.6	Proposed Solution must support Industry's common storage protocols such as iSCSI, FC or Network File Sharing (NFS).

HYPERCONVERGED INFRASTRUCTURE (HCI) HARDWARE

ITEM NO. 07	HARDWARE (SERVERS) FOR HCI	03 Units
--------------------	-----------------------------------	-----------------

S#	Technical Description, Specifications and Standards Required Per Unit	Quantity Per Unit
6.1	2U Chassis with 12 (3.5") 2x (2.5") Disk Slots or better	01
6.2	Intel Xeon Gold 5318Y 2.1GHz, 24C/48T or better	02
6.3	32 GB RDIMMs or better	16
6.4	240GB SSD or better	02
6.5	U.2 NVMe SSD 7.68TB (read intensive), 2.5" disk or better	03
6.6	10GE Optical Ports with SFP Modules (Multimode Optical Transceiver) or better	06
6.7	1G Ethernet Copper Ports or better	04
6.8	HBA-DUALPORT-16G or better	01
6.9	Raid Card with Pass-through (JBOD) mode supported	01
6.10	700W Power Supply or better	02
6.11	Embedded Server Management Software for Remote Management	01
6.12	Complete Rail Kit for Rack Mounting	01
6.13	Front Bezel (front cover or faceplate)	01
6.14	OEM Backed Warranty (60 Months)	01

Draft Contract Form

THIS AGREEMENT made the _____ day of _____ b e t w e e n
Sukkur IBA University, Sukkur (Hereinafter called “the Procuring agency”) of the one part
and [*name of Supplier*] of [*city and country of Supplier*] (hereinafter called “the Supplier”) of the
other part:

WHEREAS the Procuring agency invited bids for certain goods and ancillary services, viz.,
Procurement of _____ for
_____, Sukkur, Sukkur IBA University has accepted a bid by the Supplier for
the supply of those goods and services in the sum of [*contract price in words and figures*]
(hereinafter called “the Contract Price”).

NOW THIS AGREEMENT WITNESSETH AS FOLLOWS:

4. In this Agreement words and expressions shall have the same meanings as are
respectively assigned to them in the Conditions of Contract referred to.
2. The following documents shall be deemed to form and be read and construed as part
of this Agreement, viz.:
 - (a) the Bid Form and the Price Schedule submitted by the Bidder;
 - (b) the Schedule of Requirements;
the Technical Specifications.
 - (d) the General Conditions of Contract;
the Special Conditions of Contract; and
 - (f) the Procuring agency’s Notification of Award.
3. In consideration of the payments to be made by the Procuring agency to the Supplier
as hereinafter mentioned, the Supplier hereby covenants with the Procuring agency to provide
the goods and services and to remedy defects therein in conformity in all respects with the
provisions of the Contract
5. The Procuring agency hereby covenants to pay the Supplier in consideration
of the provision of the goods and services and the remedying of defects
therein, the Contract Price or such other sum as may become payable under
the provisions of the contract at the times and in the manner prescribed by the
contract.

IN WITNESS whereof the parties hereto have caused this Agreement to be executed in
accordance with their respective laws the day and year first above written

Signed, sealed, delivered by _____ the _____ (for the Procuring
agency)

Signed, sealed, delivered by _____ the _____ (for the Supplier)

Performance Security Form

To:

**Sukkur IBA University,
Sukkur.**

WHEREAS *[name of Supplier]* (hereinafter called “the Supplier”) has undertaken, in pursuance of Contract No. *[reference number of the contract]* dated _____ to supply *[description of goods and services]* (hereinafter called “the Contract”).

AND WHEREAS it has been stipulated by you in the said Contract that the Supplier shall furnish you with a bank guarantee by a reputable bank for the sum specified therein as security for compliance with the Supplier’s performance obligations in accordance with the Contract.

AND WHEREAS we have agreed to give the Supplier a guarantee:

THEREFORE, WE hereby affirm that we are Guarantors and responsible to you, on behalf of the Supplier, up to a total of *[amount of the guarantee in words and figures]*, and we undertake to pay you, upon your first written demand declaring the Supplier to be in default under the Contract and without cavil or argument, any sum or sums within the limits of *[amount of guarantee]* as aforesaid, without your needing to prove or to show grounds or reasons for your demand or the sum specified therein.

This guarantee is valid until the _____ day of _____.

Manufacturer's Authorization Form

To:

**Sukkur IBA University,
Sukkur.**

WHEREAS *[name of the Manufacturer]* who are established and reputable manufacturers of *[name and/or description of the goods]* having factories at *[address of factory]*

do hereby authorize *[name and address of Agent]* to submit a bid, and subsequently sign the Contract with you against NIT No. *[reference of the Invitation to Bid]* for the above goods manufactured by us.

We hereby extend our full guarantee and warranty as per Clause 12 of the General Conditions of Contract for the goods offered for supply by the above firm against this Invitation for Bids.

[signature for and on behalf of Manufacturer]

Note: This letter of authority should be on the letterhead of the Manufacturer and should be signed by a person competent and having the power of attorney to bind the Manufacturer. It should be included
